The Friday conversation

Week	Question to ask
1	How does AI learn, and how do we know it works?
2	How do organisations collect, clean and use data, and why does quality matter?
3	How do teams build, test and improve machine-learning systems?
4	How do professionals use generative AI safely and effectively?
5	How do organisations make sure AI is fair, transparent and accountable?
6	How can I design, test and pitch an AI solution that helps real people responsibly?

Safety, ethics and wellbeing

WHO TO CONTACT

Every adult on the programme is trained in safeguarding. Placements are risk-assessed, students are never alone with an adult behind a closed door, and they never handle confidential data.

> **Digital ethics.** Students use only approved tools and accounts, never enter personal data into AI tools, and never test or access any system without written authorisation. We teach how to protect, not how to attack.

Why parents choose Spectrum

Diagnostic first
Every programme starts by finding exactly where a learner is, so time is spent on what matters.

Small groups, real attention
Tutor and supervisor ratios are kept small so every student is known by name.

Safe by design
Background-checked staff, clear safeguarding procedures and parents kept informed every week.

Evidence you can keep
Journals, portfolios, reports and certificates that schools and universities can see.

Talk to us. Book a free consultation through the Spectrum website or ask your Spectrum programme lead. We listen first, then recommend the right pathway.
