10 November 2026

To students aged 10 to 18

Step out of the classroom and into real work

Dear student,

What do lawyers, engineers, journalists, data scientists and civil servants actually do all day? Spectrum placements let you find out for yourself, before you choose your subjects, your degree or your career.

On a Spectrum placement you spend six weeks with a real organisation. The first week is our Academy, where you learn how organisations work, professional skills and how to stay safe. Then you spend four weeks inside a host team with a mentor, completing real tasks every week. In the final week you present your own idea or project to the host's leaders.

Choose your placement

- **Junior Executive Programme: Industry** (ages 10–16): operations, marketing, finance and strategy inside a company.
- **Junior Executive Programme: Community Immersion** (ages 10–16): NGOs, research institutes and public bodies.
- **AI Programme** and **Cyber Security Programme** (ages 11–17): work with teams that build AI or defend organisations online.
- **Career Pathways** (ages 15–18): six months in law, public administration, politics and policy, or your own field, with a mentor.

You will come away with new skills, a portfolio, a certificate and a mentor's reference, and much more confidence about what you want to do next. Your placement also counts as evidence for CAS, Service as Action and university applications.

Talk to your parents, then enrol at **spectrum-learning.com/placements** or call **+92 324 4449039**. We look forward to meeting you.

With warm regards,
The Spectrum Advanced Learning team
